swiftrak - COMPLETE PEACE OF MIND IN ONE VERY SIMPLE TRANSACTION

According to Interpol statistics a vehicle is stolen in Europe every 20 seconds... that's nearly 1,000 vehicles per day in the UK alone.

50% of those vehicles are never recovered...

To combat that trend, insurance companies are insisting that high value and high performance vehicles are fitted with vehicle track and recover technology; and even if your insurance company doesn't mandate installation of the technology attractive premium discounts are still offered - saving you money.

swiftrak has been specifically designed to take the pain away and provide complete peace of mind for the entire time you own the car in one very simple transaction.

swiftrak technology is supplied and fitted to your vehicle and the highly competitive retail price includes a 12 or 36 months airtime and monitoring subscription.

swiftrak will:

- Help you to obtain competitive insurance cover on high value vehicles.
- Help you to obtain a discount on your insurance premium for most vehicles.
- Help recover your vehicle should it be stolen and ensure that you don't become another Police statistic.

HOW DOES WORK?

Thatcham™
Quality Assured
Category 6

Thatcham Assurance is the certification mark of the Thatcham MIRRC (Thatcham Category 6).

Using the latest global positioning, mobile phone and motion sensing technology, implanted deep in the heart of your vehicle **swiftrak** is committed to helping in the recovery of your stolen vehicle and stopping thieves in their tracks.

swiftrak protects you in two ways:

Proactively - By recognizing unauthorised or illegal movement of your vehicle via it's motion sensing technology - it has been towed away for example

Reactively - Once you've confirmed the vehicle theft, the **swiftrak** Secure Control Centre* will activate live track and will work directly with the police to quickly recover your vehicle.

All **swiftrak** units include battery back-up protection for up to one month in the event of the vehicles main battery being removed.

swiftrak ensures your vehicle is covered 24/7 and will immediately alert the Secure Control Centre to provide the exact location of your vehicle 365 days of the year - the Control Centre is manned 24 hours per day every day of the year including Christmas Day.

*The **swiftrak** Secure Control Centre will "live" track your vehicles exact location, speed and direction of travel using global positioning technology (GPS). In live tracking mode, position updates are sent to the Control Centre every 2-5 seconds.

Four simple steps to the swift recovery of your stolen vehicle:

1 NOTIFY

In the event of your vehicle being stolen, notify the Police immediately and ensure that you obtain a crime reference number.

2 INFORM

Call the **swiftrak** Secure Control Centre on **0871 2221233** and inform us of the case and provide us with the crime reference number.

3 LOCATE

The **swiftrak** Secure Control Centre will begin to live track and locate your vehicle.

4 RECOVER

The Police will recover and return your vehicle to you.
